Catheter & Line Securement
for securing all types of lines, tubes and catheters

Grip-Lok is a stabilization and securement device that is strong enough to lock catheters, tubes and lines securely in place, yet versatile enough for almost any securement situation. Grip-Lok is latex free and packaged sterile, allowing you to use Grip-Lok close to the insertion site or right in the sterile field.

Simple... Grip-Lok is applied in the same simple manner as a bandage and can be easily placed and adjusted with gloved hands.

Safe... Grip-Lok holds better than tape and helps prevent dislodgement and migration, resulting in reduced risk of lost lines and patient discomfort. Using Grip-Lok for catheter stabilization conforms to the new Infusion Nursing Standards of Practice2 and can eliminate the need for sutures and unscheduled catheter restarts, thus directly reducing needlestick injuries.

Secure... Durabley engineered, Grip-Lok holds better than tape and helps prevent dislodgement and migration, resulting in reduced risk of lost lines and patient discomfort. Using Grip-Lok for catheter stabilization conforms to the new Infusion Nursing Standards of Practice2 and can eliminate the need for sutures and unscheduled catheter restarts, thus directly reducing needlestick injuries.

Versatile... most Grip-Lok models can be universally used with a wide range of lines and tubes along with virtually all catheter brands and types.

* Individually Packaged, Sterile

All Zefon medical products are sold exclusively through specialty distributors. Product availability may vary by country/region. Please contact your local Zefon distributor for product, pricing and availability information in your area. A list of distributors can be found in the Where to Buy section on our website at www.zefon.com/medical.
Grip-Lok® utilizes hypoallergenic latex free adhesive and is available with hydrocolloid adhesive for patients with extra sensitive skin. The hydrocolloid adhesive is very gentle on the skin and will breakdown with water for ease of removal.

**Common Applications:** Grip-Lok can be secured anywhere on the body and can be used universally with lines, tubes and catheters of varying sizes.

- Chest Tubes
- Dialysis Catheters
- Intravenous Lines
- Feeding Tubes
- Central Venous Catheter
- Elderly Patients
- Arrow CVC Catheters

**Small**

<table>
<thead>
<tr>
<th>Grip-Lok Small (3200S) universal stabilization device is strong enough to lock lines and tubes 1.5 to 4.5 mm in diameter. The 3200S is designed to provide a smaller footprint area such as on infants or children.</th>
</tr>
</thead>
</table>

**Medium**

<table>
<thead>
<tr>
<th>Grip-Lok Medium (3300M) universal stabilization device is versatile enough for almost any securement situation and is strong enough to securely hold lines and tubes 3.5 to 8 mm in diameter.</th>
</tr>
</thead>
</table>

**Large**

<table>
<thead>
<tr>
<th>Grip-Lok Large (3400L) universal stabilization device is strong enough to lock lines and tubes 6 to 13 mm in diameter. This device is designed to provide firm securement for chest tubes and provides comfortable securement of wide range of latex Foley catheter sizes.</th>
</tr>
</thead>
</table>

**Small Hydrocolloid**

<table>
<thead>
<tr>
<th>Grip-Lok Small Hydrocolloid (3200SH) universal stabilization device is capable of securing tubes and lines ranging from 1.5 to 4.5 mm in diameter. The hydrocolloid adhesive is a water soluble pectin based adhesive that is designed to be very gentle on the fragile skin of neonatal and elderly patients.</th>
</tr>
</thead>
</table>

**Medium Hydrocolloid**

<table>
<thead>
<tr>
<th>Grip-Lok Medium Hydrocolloid (3300MH) universal stabilization device provides firm securement of feeding tubes including silicone materials and will fit tube sizes ranging from 1.5 to 4.5 mm in diameter. With a very small footprint the 3300MH is designed to provide securement on the smallest of patients.</th>
</tr>
</thead>
</table>

**Extra Small Hydrocolloid**

<table>
<thead>
<tr>
<th>Grip-Lok Extra Small Hydrocolloid (3100ESH) universal stabilization device is capable of securing tubes and lines ranging from 1-3 mm in diameter.</th>
</tr>
</thead>
</table>

**Nasal Gastric Hydrocolloid**

<table>
<thead>
<tr>
<th>Grip-Lok Nasal Gastric Hydrocolloid (2100NGH) provides firm securement of feeding tubes including silicone materials and will fit tube sizes ranging from 1.5 to 4.5 mm in diameter. With a very small footprint the 2100NGH is designed to provide securement on the smallest of patients.</th>
</tr>
</thead>
</table>

**Epidural Catheter**

<table>
<thead>
<tr>
<th>Grip-Lok Medium Epidural (3300MEPI) is a catheter stabilization device that provides a firm securement of epidural catheters. The low profile of the 3300MEPI is designed for maximum patient comfort.</th>
</tr>
</thead>
</table>

**Foley Catheter**

<table>
<thead>
<tr>
<th>Grip-Lok Medium Easy Secure (3300MC-ES) is a stabilization device that provides a securement of latex Foley catheter sizes. The 3300MC-ES is able to secure lines and tubes made from silicone and other plastic compounds, something even tape cannot do.</th>
</tr>
</thead>
</table>

**Medium Wide Adhesive**

<table>
<thead>
<tr>
<th>Grip-Lok Medium Wide Adhesive (3300MWA) will adhere and secure catheters made from silicone, PVC, and other plastic compounds. The versatility of the 3300MWA will secure larger tubes in addition to a wide variety of hub sizes and shapes.</th>
</tr>
</thead>
</table>

| The 3300MC-ES will also fit alternative catheter attachment points. |

**BD® Arterial Cannula with FloSwitch®**

<table>
<thead>
<tr>
<th>Grip-Lok Medium Catheter Securement for the BD Arterial Cannula with FloSwitch (3301MCS-BD) is a stabilization device that provides a securement of latex arterial catheters. The 3301MCS-BD is not available in North America.</th>
</tr>
